OPTAIN Optimal Strategies to Retain
Water and Nutrients

Welcome to OPTAIN Newsletters

A periodical summary of all the news revolving around the OPTAIN project.
To find out more about what you can expect next, check our [website](#).

What is OPTAIN?

In our initial article, Prof. Dr. Martin Volk briefly describes the Horizon 2020 OPTAIN project. He also answers to our questions about its key elements and purpose.

🕒 5 MIN READ

“OPTAIN will bring together stakeholders and scientists from 15 European countries to identify the best performing combinations of Natural Small Water Retention Measures for different regional conditions. By filling this knowledge gap, we provide an important contribution for a sustainable management of small agricultural catchments.”

Prof. Dr. Martin Volk, OPTAIN Coordinator
Helmholtz Centre for Environmental Research – UFZ

Kick-off meeting with a twist!

🕒 2 MIN READ

COVID-19 pandemic forced the water to digitalize. But water always finds its way.

An inspiring cooperation has started

🕒 3 MIN READ

WATERAGRI

OPTAIN joined forces with WATERAGRI. We asked Prof. Dr. Miklas Scholz (Lund University) to tell us more about the project.

OPTAIN Co-creators

Multi Actor Reference group

🕒 5 MIN READ

Behind every great deed are great people shaping it. Many different stakeholders provide their input to magnify the success of OPTAIN. Here's how they do it.

What is NSWRM and why should I care?

🕒 1 MIN READ

NSWRM are small and multi-functional measures for the retention/management of water. When used right, they can significantly improve our lives.
